Career Objective

To obtain an internship in an IT firm where I can apply my frontend development skills and problem-solving abilities to real-world projects.

Skills

- **Programming:** HTML, CSS, JavaScript, React.js, Java (Swing)
- **Tools:** Git, GitHub, MS Office
- **Database:** MySQL

Projects

Cloud Kitchen Platform *(React.js, React Router, UI/UX Design)*
Developing a fully responsive cloud kitchen platform inspired by Foodmandu and Bhoj. Includes dynamic restaurant listings, food categories, user role selection (consumer/provider), and seamless navigation.

Responsive Movie Platform *(React.js, React Router)*
Built an OTT-style movie web app with features like trending sections, single movie pages, and mobile responsiveness. UI designed from scratch for a Netflix-like experience.

Real Estate Listing Platform *(React.js)*
Created a dynamic property listing app with filters, featured sections, and clean layouts to enhance user exploration.

Car Selling Website *(HTML, CSS, JavaScript)*
Developed a responsive frontend site for a car dealership, including car listings, service info, and contact options in a user-friendly layout.

IoT Remote Control Car *(Arduino, Servo Motor, Bluetooth/WiFi Modules)*
Built a small-scale IoT-based car controlled via wireless signals. Focused on smooth motor control, signal communication, and real-time movement using Arduino.

Education

BSc. CSIT – Texas International College (2023–Present)
+2 Science (Physical) – Arniko Awasiya Secondary School (2021–2023)

Certifications & Training

- IoT Training – Texas International College
- HTML, CSS, JavaScript – Web Development Basics
- Texas Hackathon Vol. 1 – Certificate

Languages

- English (Fluent)
- Nepali (Native)
- Hindi (Conversational)

Hobbies

Reading tech blogs, traveling, coding mini-projects
